Eco-Fasten™
Attachments secure, roof intact.

Building Green with Alpine SnowGuards™ and Eco-Fasten™:

Our mission at *Vermont Slate and Copper Services, Inc.* is to fabricate and supply premium quality snow retention systems, photovoltaic accessories and universal roof attachments that will contribute points necessary for certification in the Leadership in Energy & Environmental Design's (LEED®) Green Building Rating System as required by the U.S. Green Building Council.

LEED® with Alpine SnowGuards™ and Eco-Fasten™:

We use recycled steel when manufacturing *Alpine SnowGuards™* and Universal Roof Attachments (URA) from *Eco-Fasten™*. The aluminum and stainless steel that we fabricate with contains 50% post-consumer recycled metal. The brass snow guards are made from 70% recycled material. The copper snow guards are made from approximately 90% post-industrial recycled material. The steel, aluminum, brass and copper that we fabricate with are obtained from within 500 miles of our manufacturing facility.

Alpine SnowGuards™ and the LEED® Rating System:

Alpine SnowGuards™ and the Universal Roof Attachments (URA) from *Eco-Fasten™* are relevant in LEED® for New Construction (NC) Version 2.2 and LEED® for Existing Buildings. These are available at www.leadbuilding.org

Performance Credits Awarded by LEED® With Alpine SnowGuards™:

Listed here are the categories where one may earn credit points by choosing products manufactured by *Alpine SnowGuards™*: Energy and Atmosphere, (Sections 2 and 6); Material and Resources (Sections 4.1, 4.2, and Sections 5.1, 5.2) and Innovation & Design Process (ID Credit 1-1.4: 1-4 pts).

Certification for the LEED® Rating System:

Certified: 26-32
Silver: 33-38
Gold: 39-51
Platinum: 52-69
